

Gabriel Delgado

Full-Stack Developer

About me

I consider myself a person willing to learn and develop a high capacity in the area of web design and implementation.

I enjoy working with various types of data and transforming them into attractive and functional web solutions that exceed customer expectations.

I always pursue continuous improvement and constant development of my skills, I never close the door to the possibility of learning new technologies.

Abilities

- Effective communication
- Problem solving
- Agility with results
- Commitment to the ongoing project

Education

Holberton Uruguay, Febrero-Noviembre 2023

Fundamentals of computer science:

- In this intensive program, I acquired solid knowledge in the fundamentals of software development. The teaching methodology focused on practical projects, encouraging the active application of the concepts learned.
- I began my journey by exploring the principles of development with low-level programming languages, with the objective of establishing a solid foundation. In this way I have understood and been able to adapt new frameworks comfortably whenever the situation requires it.
- I have also reinforced my soft skills, such as teamwork, public speaking, punctuality, among others.

Projects

Alquivago - Full-Stack Engineer - UX/UI designer

Web application that collects information from multiple sources and compares prices for long term rentals in Montevideo.

As a member of this project:

- I led the UX/UI design with a focus on providing the best user experience along with an attractive interface.
- Using tools such as Figma, for the conceptual design of the user interface, Next.js (React based development framework), Tailwindcss, among others.
- This web application is deployed using vercel services, you can access the page by [clicking here](#).
